# Dipankar Jana

Associate Tech Lead (Frontend Engineering)

I'm Dipankar Jana. I am passionate about building rich user experiences. I am currently working with OkCredit. Previously worked at Healofy and Clearfunds (acquired by MobiKwik). I have a total work experience of **8 years**.

## Experience

**2022-02 - Current**

### Associate Tech Lead (Frontend)

*OkCredit, Bengaluru, Karnataka (Remote)*

- Currently working as an ATL for the frontend team and I am involved in shipping and developing multiple web projects across the organization.
- Collaborated across teams to ship and scale major projects, contributing to company-wide growth initiatives.
- Built the end-to-end frontend for the Term Loan platform, enabling **Rs. 400Cr+** in disbursal at scale.
- Contributed to developing the merchant and NBFC dashboards, leveraging Laravel, modern JavaScript frameworks, and internal APIs.
- Integrated multiple payment gateways, including Razorpay, Cashfree, and Easebuzz, enabling seamless loan repayments and transaction processing.
- Led migration efforts from legacy codebases to modern frameworks (e.g., React, TypeScript).
- Actively involved in architecture decisions, mentoring junior engineers, and ensuring engineering best practices across projects.

**2021-01 - 2022-02**

### Senior Software Engineer (Frontend)

*OkCredit, Bengaluru, Karnataka (Remote)*

- Built several platform-related tools, such as an in-house component library and other utility libraries for react and react-native.
- Have worked on the mobile PWA version of OkCredit web.
- Have worked on building the base architecture for React apps, using plugins like Redux, Redux-observable, Redux-Saga, custom React hooks, and tools like TypeScript.
- Have worked on solidifying design language between multiple projects and using tools like styled components, JSS and TailwindCSS to maintain consistency across applications when required.
- Have worked on setting up CI/CD pipelines for our applications using Github Actions.

## Skills

JavaScript

TypeScript

React.js

Vue.js

Svelte

Next.js

Gatsby

Vite

Redux

WordPress

jQuery

- Built a custom GitHub Action toolkit library for automating CI/CD workflows.
- Have set up unit tests for various web projects across the organization.
- Tools like LogRocket and New-Relic have been used to measure and improve performance.
- Shipped multiple web-based extensions for the OkCredit Android app.

**2018-06 - 2021-01**

### Software Developer (Frontend)

*Healofy, Bengaluru, Karnataka*

- Healofy is a social network for mothers. The core application stack uses Google App Engine for the backend and React.js for the frontend side of the application. I was involved in the development of the web application, which required the use of some modern technologies such as SASS, ES6, and webpack.
- Have built several internal tools and dashboards for the operations team.

**2017-07 - 2018-05**

### Front End Developer

*Clearfunuds (Acquired by MobiKwik), Mumbai, Maharashtra*

- Our core application stack consists of Ruby on Rails for the backend and Vue.js for the frontend, providing a robust foundation for our projects. I was involved in the development of a sophisticated single-page application using cutting-edge technologies like SASS, ES6, and Webpack. As a key team member, I contributed to integrating Vue.js into our application, shifting from traditional Rails views to a more dynamic interface.
- Fund Finder - A tool that helps investors choose which funds to invest in. The frontend is built entirely on top of Vue.js.
- Investor Dashboard - Created a dashboard that is used by investors, development required the use of Vue.js, Vue-router.
- Vue component library for investor dashboards.

## Open Source Projects

- **Larakit** - **A Laravel 11.x Starter Kit** - **https://github.com /iamdipankarj/larakit** - **https://larakit.dipankarjana.com/** - Larakit is a lightweight and powerful Laravel starter kit designed to streamline web application development. With built-in authentication, role-based access control, and seamless integrations, Larakit helps developers kickstart their projects with best practices and modern tooling. Whether you're building a small business app or a large-scale platform, Larakit provides the flexibility and efficiency you need to launch faster.
